December 11, 1996

Major Projects

- **Fluke**: model, kernel, and operating system
- **High confidence**: resource management, high assurance, information security
- **Flick**: flexible, optimizing IDL compiler supporting interface annotation
- **OS Toolkit**: modularized infrastructure for OS's

Digression:
Flick - Optimizing IDL Compiler

- (talk off of Flick picture)
- IDL: interface defintion language
- Presentation layer (data marshaling, encoding, conversion) becoming bottleneck as transport overhead plummets and OS gets clever
- Apply traditional compiler techniques
- Use powerful intermiedate representations
- ....
